

DESIGN CRITERIA

1. Related Sections: See related Design Standard Plates.
2. This Section includes markerboards and tack boards used in Commissary Training Rooms. Markerboards are low gloss finished porcelain enamel steel laminated to a medium density fiberboard (MDF) backing. Tack boards are polyester fabric faced cork sheets laminated to a particle board backing.
3. Design of markerboards and tack boards shall comply with Design Standard Plate for Training Room Cabinets.
4. Coordinate markerboard and tack board locations with other design disciplines (i.e., electrical receptacles, wall thermostats, etc.). Contract Documents shall clearly identify requirement for wood blocking (or other material) within metal stud framed walls for proper attachment and support of markerboards and tack boards.
