

DESIGN CRITERIA

1. Related Sections: See related Division 31 Section Earthwork for filling and grading work, Division 03 Section Cast-In-Place Concrete for concrete equipment bases/pads for gate operators, drives and controls, and Division 26 Design Criteria for electrical service and connections for motor operators, controls, limit switches, and other powered devices and system disconnect switches.
2. This Section specifies galvanized steel chain-link fabric and framework, barbed wire, and gate operator.
3. Chain-link fences are used to secure the commissary receiving area, grade mounted mechanical / electrical equipment, and trash containers when required by the Installation and UFC 4-010-01 DoD Minimum Antiterrorism Standards for Buildings. The requirement to secure these areas shall be determined during the Design Charrette process.
4. Check slope on the pavement in the area of the dumpster gates to ensure gates do not bind on pavement.
